

Lynx® Central Control

All your irrigation information at your fingertips. Anytime. Anywhere.

BETTER INFORMATION FOR BETTER DECISIONS

The Toro® Lynx Central Control System was developed specifically to help you address the unique challenges and changing priorities you face every day. With Lynx, you can now have all of your essential irrigation information readily available in one place, conveniently combined into a single, intuitive interface.

Easy to Set Up

Lynx was developed for quick setup – it gives you a fast, accurate way to setup your system to put water exactly where you want it, and then allows you to make edits as your course conditions change.

Easy to Use

Lynx has a distinct user interface that combines all essential data and intuitively presents the information you need (alerts, scheduled watering and more) at a glance. It's easy to access all the information you need with one click through your Favorites Menu.

Easy to Control

Lynx empowers you to take quick, accurate action to effectively control and manage your golf course by providing past, present and future course information from multiple sources into a single, intuitive interface.

Support available 24/7 with NSN®

Toro's exclusive National Support Network provides software and network assistance from experienced service professionals who understand what you need. NSN Connect can be linked directly to the system for instant support or scheduled data back-up protection.

Available anywhere, anytime.

Lynx gives you the ability to access your irrigation controller from anywhere - simply and securely! You can access your Lynx Control System (and all your programs, files and e-mail) whether you are at home, on the road or out there in the field.

“Comparing the 12-month cycle prior to installation to the same 12-month cycle post-installation, year to date, we have saved 35% of our water consumption, which equates to 702,937 cubic metres. Having Lynx has played a major part in this. We have accurate daily ET readings and are able to literally put water down where we need it. Conditions have arguably never been better.”

Craig Haldane
Director of Golf Course Maintenance, Emirates GC
Dubai (UAE)

“Lynx allows us to think about irrigation less because it does such a good job at managing where the water needs to be.”

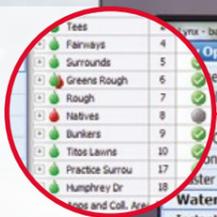

Isaac Kasper
Assistant Superintendent
The Minikahda Club
USA

The Lynx System helps you to:

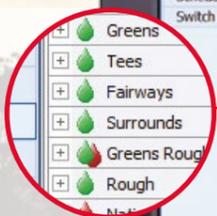

- Optimally **manage** your water and resources
- Find more **time** in your day for other tasks
- Maximize your course **playability and aesthetics**
- Control your **costs** for water, utilities and labor

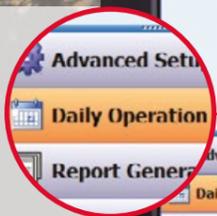

Dynamic drilldown by area, for quick overview by area and by hole

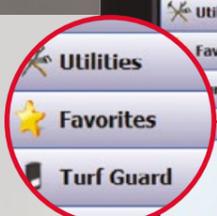

Irrigation at a glance
The colour of the water drop tells you if it's going to irrigate or not.

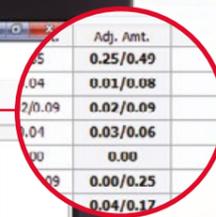

Simple menu
All similar functions are organized into folders

Save the most important pages
All the daily functions can be one mouse-click away

Decide how many inches/mm/minutes to water.

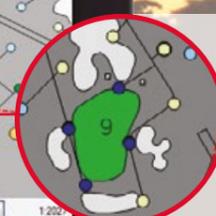

Intelligent irrigation with Turf Guard®
Your Turf Guard sensors help you to decide when to irrigate and how much water to apply.

Decide which days of the week you are going to turn on sprinklers.

Easily edit your course map or create your own interactive map.

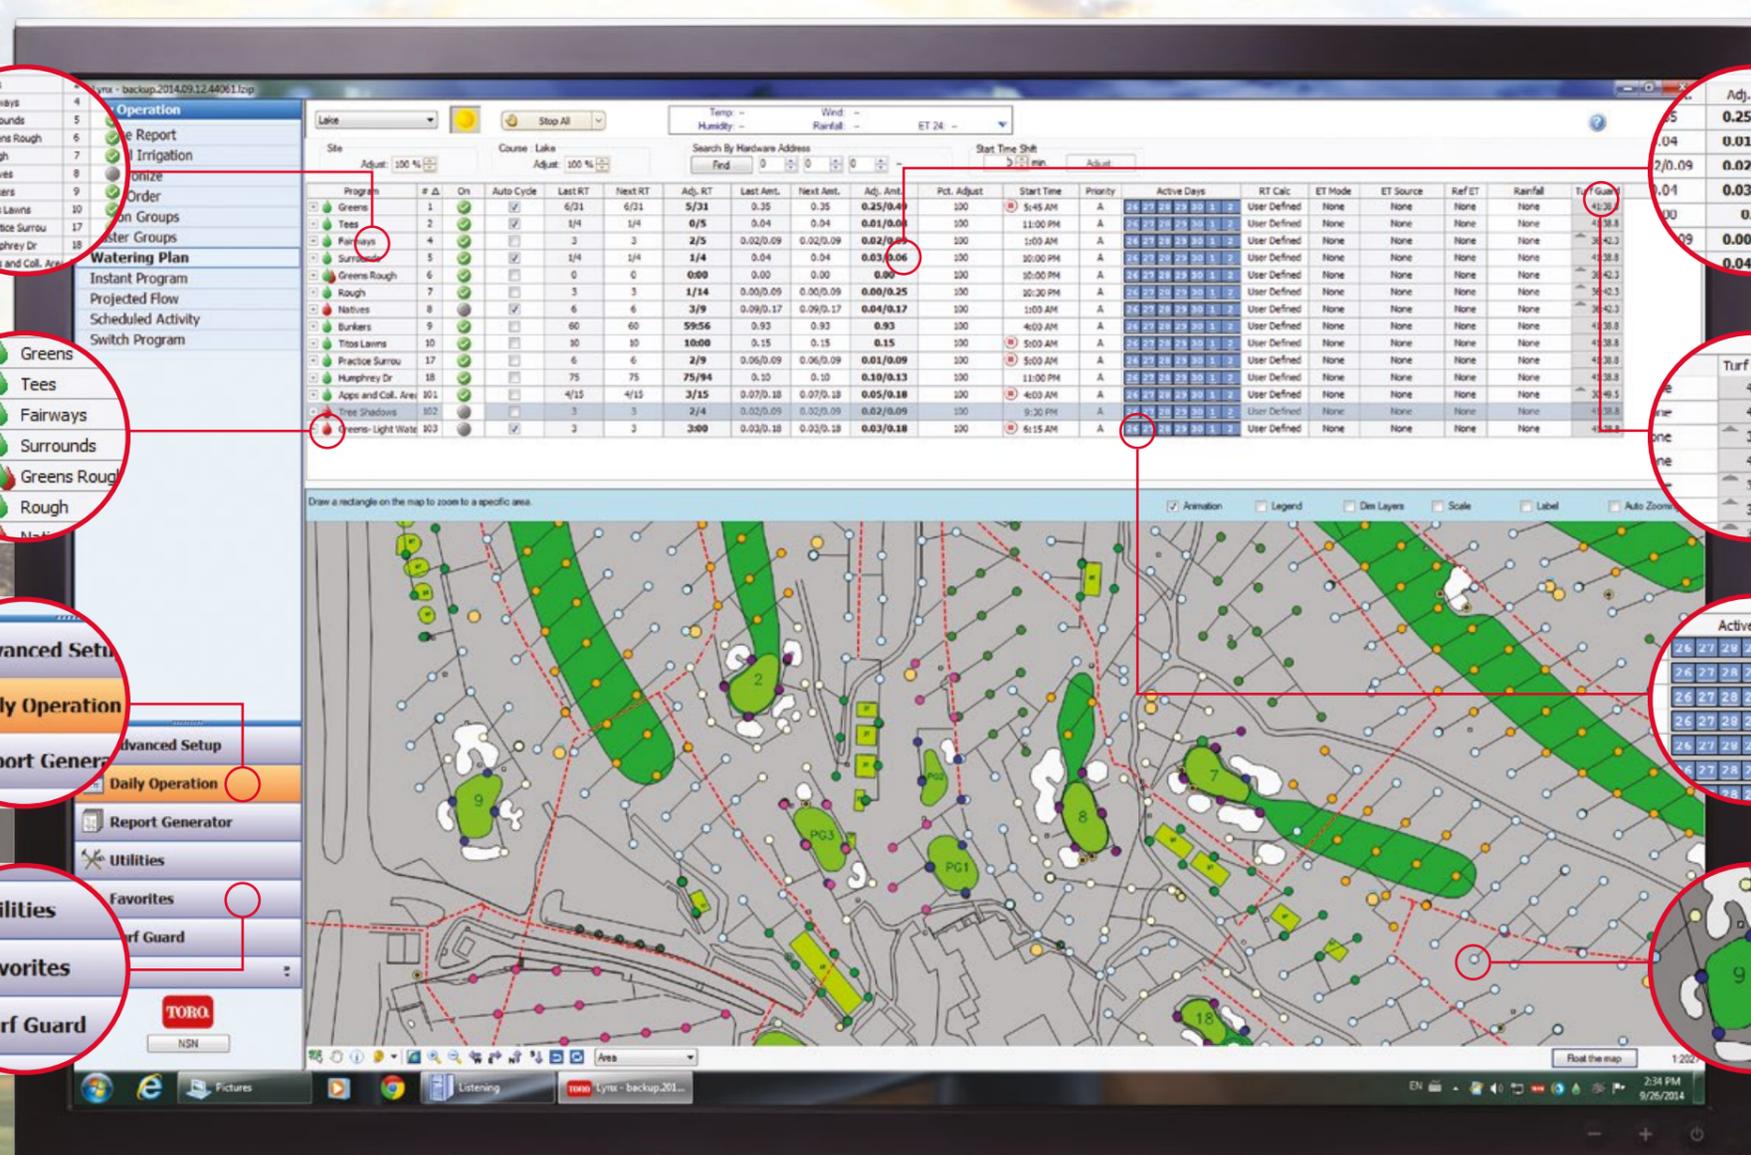

"One of the things I find a time saver is being able to control Lynx at home."

Brandon Schindele
Golf Course Superintendent, Edina Country Club
USA

"If you want to make a change it is easy to do and easy to train other staff how to run the program."

Jeff Johnson
Golf Course Superintendent, Minnikahda Country Club, USA

Imagine ALL your irrigation information at your fingertips. Lynx: redefining Ease and Efficiency of irrigation control.

“Very user friendly. With Lynx, you can create a new program in a matter of a couple of minutes.”

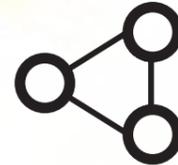

Brandon Schindele
Golf Course Superintendent,
Edina Country Club
USA

Superior course map editing and creation

The advanced functionality of the Lynx Central Control System enables you to **edit your course map easily, or create your own fully interactive map** using a digital image of your course. Setting up your map is simple, and Lynx lets you **program and control your irrigation activities right from the map**, with instant access to operation feedback from the rest of your irrigation system.

Unsurpassed integration with other system components

Lynx offers unequalled integration with other turf management components, giving you access to all of the information needed to support your irrigation management. Lynx can be seamlessly integrated with field hardware, pump stations, weather stations, electrical systems, smartphones and much more, including the Toro Turf Guard Wireless Soil Monitoring System.

Easily set up and customize your irrigation system

Because course managers insist on easy-to-use software, the Lynx Central Control System was developed for **quick setup and operation**. Lynx was designed by Toro to reflect the input and preferences of the individuals who would be installing and using it.

Comprehensive reporting increases your productivity

Armed with the thorough reports provided by Lynx, you'll be able to **immediately address any irrigation concerns and avoid potential course damage** . . . or just move on to other tasks when Lynx lets you know that things are running as planned.

- ✓ The interactive map layer can be quickly created using any digital image for the background.
- ✓ Easily add, drag, drop and assign sprinklers, satellites, Turf Guard® wireless soil sensors and switches to their precise locations within the map's irrigation layer.
- ✓ Easily designate pre-set or customized water distribution based on entire areas of your course, specific holes or individual sprinkler heads.

- ✓ A comprehensive Course Report function supports your scheduled irrigation by providing system status information, even on manual watering activities.
- ✓ Lynx auto-generates reports after each night's watering, so you can quickly confirm all sprinkler runtimes at a glance.

Lynx® Central Control System
LYNX GAC™

TAP INTO THE FUTURE AT A FRACTION OF THE COST

You don't need a complete overhaul to have the latest technology - just Lynx GAC. Lynx GAC bridges the gap between your old system and the new Toro Lynx Central Control System.

"The Lynx system itself is just so reliable, it was effortless to install, and the fact that it can be made to be so precise, has been really good for us."

Jonathan Wood
Head Greenkeeper
Enville Golf Club
United Kingdom

"With Lynx you have more control, you can see everything at a glance on one screen and it is easy to operate."

Rudi Hermans
Golf Course Superintendent, Millenium Golf Club
Belgium

Get the **benefit** of a new system for a **fraction of the cost**

✓ **Upgrade to Lynx**

All the advantages of Lynx are available to you. A system that is intuitive and easy to install, control and use. Lynx can be operated from a laptop, smartphone or tablet anywhere and anytime. And if you need any help, our NSN Support is available 24/7.

✓ **Use your resources efficiently**

Lynx allows saving of water and electricity by up to 35% of your current costs. Visit www.torolynx.com for testimonials and more information.

✓ **No digging required, leave them in the ground**

With Lynx GAC you can keep your system in the ground with no digging. You only need to change the decoder modules and the central. It's that easy.

✓ **Make your investment last longer**

With Lynx GAC you can give your irrigation system a life extension. Your system will be fit for the future for a fraction of the cost of a new irrigation system.

The Lynx Central Control System offers unequaled integration with Toro's Field Control Systems, enabling you to have the complete information needed to support your irrigation decisions.

TORO FIELD CONTROL SYSTEMS

Toro is the leading golf irrigation company in the world and provides an array of field control options

Satellite control

Satellite systems use controllers placed on each hole to operate a specified number of stations. These controllers are coordinated to work together with a central computer, but can also be programmed independently for grow-in and stand alone operations.

- ✓ Station Based Flow Management: reduces night time water window and optimises pump capacity.
- ✓ Satellite systems offer superior back-up, and can be operated independently from the Computer system using the faceplate.
- ✓ Satellite upgrade kits enable older Toro satellite units to be upgraded very cost effectively versus a complete system change-out.
- ✓ Hardwire, 2-way radio and paging communication options allows for easy installation and maintenance.

Advanced 2-Wire Control

2-wire systems replace satellite pedestals with intelligent modules installed near or on the sprinklers. These modules are all connected to the central computer by a simple two-conductor cable. The elimination of satellite pedestals and thousands of metres of wire simplifies the installation, improves aesthetics and reduces cost.

- ✓ Continuous Two-way Communication
- ✓ Real Time Diagnostics and Voltage Tests
- ✓ Best-in-class Broadband Lightning Protection
- ✓ Vandal and flood resistant
- ✓ Allow for system expansion by tapping into the cable

WE'VE GOT YOU COVERED

With Toro's exclusive National Support Network you receive software and network assistance from experienced service professionals who understand your needs. NSN provides you with a dedicated and accessible resource for central system troubleshooting, problem solving and operational assistance. Because we understand how critical your system is, should you ever need it; a replacement computer can be despatched within 24 hours.

NSN subscriptions are included with the initial central control system purchase and can be renewed for extended periods for ongoing support and access to expert advice.

Count on it.
