GeoLink[®] precision spray system

Multi Pro[®] sprayers

ACCURATE TO THE INCH. SAVINGS BY THE MILE.

GeoLink is the industry's first turf-based precision spray system. Turf professionals will benefit from substantial chemical savings thanks to individual nozzle control and sub-inch accuracy. Reporting is simple with GeoLink, and application rates, coverage maps and area and volume data are easily downloaded for thorough record-keeping. The weatherproof touchscreen is rugged enough to withstand the most challenging conditions and makes application programming straightforward with just the touch of a button.

F E A T U R E S

• RTK GNSS spray system

GeoLink is the first turf-based spray system. It is not agricultural-based like its competitors and utilises mobile Real-Time Kinematic (RTK) correction technology to provide sub-inch accuracy. This sophisticated communication system receives location data from multiple satellites and a correction source to provide precise location information. This gives the user the ability to map each spray area only once and spray it with precision year after year, saving time and resources.

• Increased efficiency

Waste is virtually eliminated with GeoLink. The system automatically turns individual nozzles on and off based on the machine's exact location and the boundaries that have been set. Knowing exactly where you are and where you have already sprayed eliminates costly overlaps and missed strips. Consistent coverage and efficient application translates into serious, operation-changing chemical, foam marker and dye savings.

• Easy-to-use touchscreen

A large, weatherproof touchscreen shows the machine's location and allows the operator to create and choose spray jobs containing multiple spray zones. When the job is finished, the system provides accurate job reports that can be downloaded for analysis.

GEOLINK® PRECISION SPRAY SYSTEM SPECIFICATIONS*

TOPCON AGS-2 RECEIVER	
DIMENSIONS (H x W x D)	53 x 130.5 x 136.5 mm (2.1 x 5.2 x 5.4")
POSITIONING SYSTEM	Real-Time Kinematic (RTK). Optional PPP (Precise Point Positioning) as fallback for RTK
CONSTELLATIONS	GPS, GLONASS, GALILEO, BeiDou, QZSS
POWER	9–28 VDC
COMPLIANCE	J1939 and ISO11783
WEATHER RESISTANCE	Achieved IP69K rating

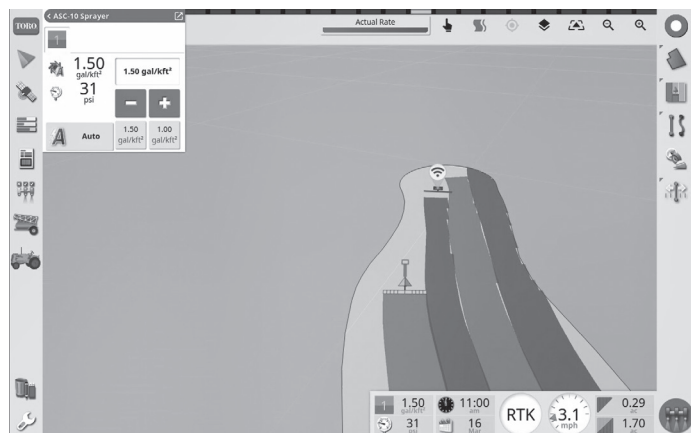

TOPCON XD+ DISPLAY	
DISPLAY	307 mm (12.1"), 1,280 x 800 px. TFT colour graphic LCD with LED backlight
DIMENSIONS	214 x 330 mm (8.4 x 13")
POWER	9–36 V input (voltage and polarity protected).
OPERATING SYSTEM	Linux with icon-based GeoLink software. NXP I.MX6®, quad core, 1 GHz processor, mass storage: 8 GB, RAM: 1 GB
FEATURES	Machine-to-machine communication, multiple inclusion zones, easy and standard modes, configurable with multi-view capabilities, interactive keypad, on-demand mini views and expandable views, 28 languages, rear-facing speaker, multiple application control, ISO UT ready, remote capability.
WEATHER RESISTANCE	Achieved IP67 rating

ACCESSORIES	
GEOLINK AS	Exclusively available for the Multi Pro 5800 (Model 41394) with GeoLink. GeoLink AS enables Auto Steer, ensuring the optimal next pass is followed and providing the most efficient use of your sprayer.
REFERENCE ANTENNA KIT	GeoLink precision spray system reference antenna kit.

Key benefits of the GeoLink precision spray system:

- Universal CL-55 mobile modem, capable of connecting to multiple mobile providers
- Use multiple machines for a single job with machine-to-machine communication
- Software for turf, not agriculture
- Repeatable sub-inch location accuracy
- Flexible, customisable and easy to use
- Intuitive icon-based menus
- Multiple inclusion zones: group similar areas into a single job
- Improved consistency: less dependence on operator skill level

RTK: Real-Time Kinematic (RTK) satellite correction is a technique used to enhance the precision of position data derived from satellite-based positioning systems, which can be used in conjunction with all positioning platforms.
